Request for Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 December 2003 has been entered.

Status of the Claims

2. The Office acknowledges receipt of Applicants Response; dated 29 December 2003.

3. Applicant has amended claim 22; claims 22-28 are pending and are examined in the instant action.

4. Receipt of a marked-up copy of Applicant's substitute specification is acknowledged but it not entered. The substitute specification needs to be accompanied by a statement that the marked up and clean copy are the same, and include no new matter.

5. All rejections not addressed below have been withdrawn.

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112 second paragraph

7. Claims 22-28 remain rejected under 35 U.S.C. 112, second paragraph for reasons of record.

In claim 22, how is the purpose of step (c) different from step (d)? These steps appear to be identical.

- Claim 22 (e) "having growing Type II": growing Type II what?
- Claim 22 (f): the amendment "[[said]]" is unclear. The "said" embryo structures lacks antecedent basis. Where did the embryos structures come from? What are they?
- in 22 (f), "plants" should be changed to "plant" for proper antecedence.

In claim 24, for clarification, "stock" should be inserted after the second "Agrobacterium" recitation.

Claim Rejections - 35 USC § 112

8. Claims 22-28 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 22 (a): Applicant has amended "gene" to recite "genetic element". The recited "genetic element" is new matter, not supported by the specification as originally filed.

Applicant traverses, stating primarily that "genetic element is a well known term by persons of ordinary skill in the art .

Applicant's traversal has been considered and is unpersuasive. Applicant has not addressed the new matter issue. A well known term not supported the specification constitutes new matter.

Claim Rejections - 35 USC § 103

9. Claims 22-25 and 28 remain rejected over Hansen, G. (US # 6,162,965), Bhojwani, SS et al (Developments in Crop Science, vol 5, pp 24-41, 198), Holton (US 5,948,955), Applicant's admitted prior art, and Stomp (US 6,040,498), for reasons of record, partly repeated below from the Office Action of 30 December 2002.

- Applicant traverses, stating primarily that the cited references, when viewed separately or in combination, do not teach or suggest the claimed invention. Applicant's traversal has been considered and is unpersuasive because the combination of references properly render the claimed invention *prima facie* obvious, for reasons of record.
- Applicant traverses, stating primarily that the Examiner has used an impermissible "obvious to try" standard in reaching the conclusion that Applicant's invention is obvious.

Applicant's traversal has been considered and is unpersuasive because

Applicant has provided no evidence that the Office used an "obvious to try" standard.

- Applicant traverses, stating primarily that none of the references cited by the Examiner discloses or suggests using 19 degree C temperature for co-cultivation with using Agrobacterium 1-2 days after rescue from glycerol stocks, an antibiotic at 15-75 mcg/L and a plant growth medium comprising a monosaccharide. And that therefore, there is not a prima facie case of obviousness.

Applicant's traversal has been considered and is unpersuasive because

Applicant's argument is not commensurate in scope with the claims. None of the claims recite the combination of 19 degree C temperature for co-cultivation with using Agrobacterium 1-2 days after rescue from glycerol stocks, an antibiotic at 15-75 mcg/L and a plant growth medium comprising a monosaccharide.

Therefore the rejection is maintained.

- Applicant traverses, stating primarily that Examiner has randomly picked bits or prior art references using the hindsight reasoning provided by Applicant's disclosure.

Applicant's traversal has been considered and is unpersuasive because

Applicant has provided no evidence as to why Applicant believes the Office has used hindsight reasoning.

- Applicant traverses, stating primarily that the Examiner's imputed conclusion of obviousness could only have been reached with the benefit of the hindsight application of the teachings of the present specification.

Applicant's traversal has been considered and is unpersuasive because

Applicant has provided no evidence that the Office has used hindsight, as discussed above.

Accordingly, these rejections are maintained.
